***Election/Restrictions***

I. Claims 1-9, drawn to a system of identifying fraud, classified in class 705, subclass various.

II. Claims 10-24 are, drawn to a method of identifying fraud, classified in class 705 , subclass various.

III. Claims 25-27, drawn to a method of identifying fraud, classified in class 705 subclass various.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as storing in memory terminating ANI and corresponding billing numbers. See MPEP § 806.05(d). Group I will be examined with group II.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Karra on 9/28/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
